## Pre & Post Care for Laser Genesis

### Before your treatment:

- **IMPORTANT- USE OF ANTIBIOTICS** - Before each treatment, please inform us if you are taking any new antibiotics or medications as they may make your skin photosensitive and likely to burn or blister. If this is the case, we may not be able to treat you for one to two weeks after completion of the medication.
- Please do not wear makeup on the day of treatment (on the area being treated).
- Excess hair may need to be shaved. Men should be cleanly shaved.
- No sun-tanning or self-tanners 4 weeks prior to treatment on area being treated. This includes spray tans, tanning lotions, tanning beds, sun exposure, etc.
- Avoid treatments that may irritate the skin for 1-2 weeks prior to treatment (waxing, depilatories, etc.)
- History of herpes or cold sores may require an anti-viral prescription prior to treatment.

### AFTER YOUR TREATMENT:

- Avoid sun exposure and use a broad spectrum (UVA/UVB) sunscreen to prevent further sun damage.
- Though unlikely, bruising, redness and swelling may occur and resolve with time.
- Avoid heat – hot tubs, saunas, etc. for 1-2 days.
- Avoid skin irritants a few days post-treatment. Products containing tretinoin, retinol, benzoyl peroxide, glycolic/salicylic acids, astringents, etc.
- Multiple treatments are required for optimal benefit. We recommend purchasing a (discounted) package of six, and then going on a maintenance program to maintain your results.
- Notify us of any concerns (blistering, excessive redness/swelling, etc.).
