

Introducing

VENUS LEGACY™

Cellulite Reduction & Wrinkle Reduction

As you get older, your body starts to produce less collagen and store more fat—this eventually leads to cellulite, wrinkles, sagging skin, and other signs of aging. Venus Legacy™ uses heat to naturally boost collagen production and break down fat cells, which smoothens out cellulite and wrinkles.

what to

EXPECT

Most patients receive 6-8 treatments per area, with each session lasting around 30 minutes. Treatments are done once a week. Consult your certified provider to determine the right treatment plan for you.

safe technology for

ALL SKIN TONES

The treatment uses radio frequency technology, which is proven to be safe and effective for all skin tones.

comfortable with

NO DOWNTIME

Enjoy a relaxing, comfortable treatment with no downtime that produces effective results.

What Venus Legacy™ Can Do

FOR YOU

reduced cellulite

no more dimpling

diminished wrinkles

younger-looking skin

How It

WORKS

Venus Legacy™ uses Multi-Polar Radio Frequency and Pulsed Electro Magnetic Fields to produce heat under the skin's surface. This process helps to naturally increase collagen and elastin fibers while also shrinking the volume of fat cells. At the same time, an adjustable pulsed suction (called VariPulse™) gently pulls the skin upward, which makes the treatment more comfortable and allows the energy to travel even deeper. The result is significantly reduced cellulite and wrinkles for more youthful skin.

Multi-Polar Radio Frequency and Pulsed Electro Magnetic Fields work in unison.

Advanced VariPulse™ technology helps the energy travel deeper into the body.
