

Introducing

VENUS VIVA™

Skin Resurfacing

Venus Viva™ is an advanced, non-surgical solution for skin resurfacing. It combines NanoFractional Radio Frequency and SmartScan™ technology to reduce the appearance of acne scars and other scars, stretch marks, rosacea, enlarged pores, deep wrinkles, and uneven skin texture and pigmentation.

what to

EXPECT

Treatments typically vary between 3-4 sessions, every 4-6 weeks. The exact number of sessions depends on the individual.

rapid

RECOVERY

You will experience mild redness post-treatment, and you can resume your regular skin care and makeup routine 24 hours after treatment.

safe for

ALL SKIN TONES

Treatments use radio frequency technology, which is proven to be safe and effective for all skin tones. Ask your doctor if Venus Viva™ is right for you.

What Venus Viva™ Can Do

FOR YOU

acne scars
& rosacea

stretch marks
& pigmentation

enlarged pores
& deep wrinkles

dyschromia
(discoloration)

uneven
skin texture

VENUS VIVA

REDUCE SIGNS OF SKIN DAMAGE

Why Venus Viva™ Is Right

FOR YOU

High Patient Satisfaction

A clinical study showed that majority of patients rated the comfort, recovery time, and results of Venus Viva™ treatments as "Excellent" and would recommend it to their friends.¹

Safe and Effective for All Skin Tones

Most skin resurfacing treatments are not safe for darker skin tones. Venus Viva™ is safe for all ethnicities, even for darker complexions.

Low Downtime

Return to your daily skin care routine 24 hours after your treatment.

How It WORKS

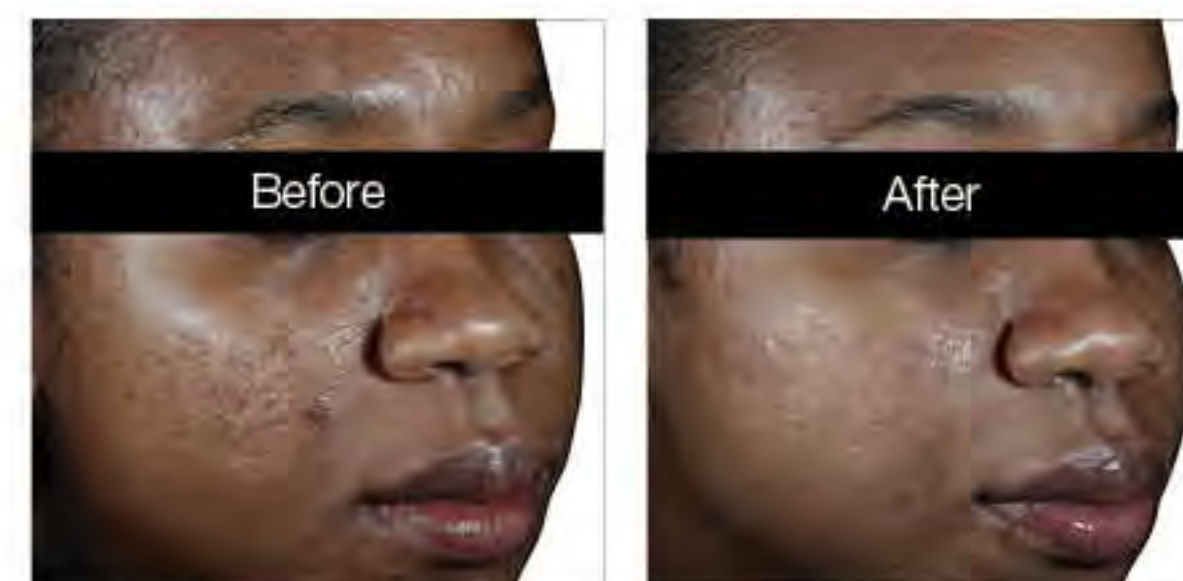

Skin Resurfacing Treatments

Venus Viva™ skin resurfacing treatments work with tiny pins that safely deliver heat (via NanoFractional Radio Frequency) through the skin's surface. This creates tiny micro-dermal wounds, which the body then works to heal naturally. This process repairs signs of skin damage seen on the surface of the skin. Since the wounds are so small, the treatment is much more comfortable than traditional CO₂ lasers, and produces satisfying results.
